

Aquasud

.The swimming pool Aquasud, is a light-flooded large complex that invites you to swim, relax and do sports. In addition to the 25m swimming pool, there is a teaching pool for children and adults, a paddling pool area for toddlers, and also a pool with slide that provides an exit to the outside.

The whole complex is very well connected to public transport, bus and train links in front of the front door, and is part of a large sports infrastructure, with outdoor swimming pool, football field, gym (under construction) and very close to the University of Lunex whose teaching is focused on sports sciences.

Apart from the accessibility of the site by public transport, a large car park with 520 spaces, 12 of which are reserved for PRM (7 spaces for PRM are located on the ground floor), is part of the enclosure

In addition to the swimming pool, AQUASUD offers a sauna area, as well as a fitness room.

All areas are accessible to PMR but require the assistance of an AQUASUD employee to access the sauna area, as this is only possible via a path not intended for customers.

Swimming pool

Name	Value
-------------	--------------

Name english	Aquasud
Text english	The swimming pool is composed of different pools, including one for sportsmen , the access for PRM is assured by the help of a mobile seat. The staff on site knows how to handle this chair and is willing to accompany the person with a disability. A learning and activity pool with movable bottom, for which access will be via steps, this can be an obstacle for PRM. The other pools such as the large balneo-ludic pool, the bubble benches, the hydromassage nozzles, the wild river against the current, the paddling pool, and the giant slide do not lend themselves to use for PRM.
